

# SEO PROJECT

**Comprehensive SEO Audit & Optimization for Organic Traffic  
Growth**

**SRISANDHIYA NARAYANAN | MBTE<sub>1</sub>-BADM-WD-T-B<sub>3</sub>**

# COMPANY – ADOBE

- ❖ I have selected the company “**Adobe**” for the SEO project analysis.

**WEBSITE:** <https://www.adobe.com/>

## COMPANY OVERVIEW:

- ❖ Adobe Inc. founded in 1982, is a multinational software company best known for its innovative design and multimedia software.
- ❖ Adobe provides cloud-based services through Adobe Creative Cloud, Adobe Document Cloud and Adobe Experience Cloud, which offer tools for creatives, marketers and businesses to create, manage and optimize content and experiences.
- ❖ Adobe has also made strides in AI with Adobe Sensei, enhancing its products with advanced automation and machine learning features.

# PRODUCTS AND SERVICES

## ❖ Creative Cloud Suite

- Photoshop (Image editing)
- Illustrator (Vector graphics)
- InDesign (Page layout and design)
- Premiere Pro (Video editing)
- After Effects (Motion graphics & VFX)
- XD (UX/UI design)
- Lightroom (Photo editing)
- Animate (2D animation)

## ❖ Document Cloud

- Acrobat DC (PDF creation & editing)
- PDF Reader (Doc viewing & annotation)
- Adobe Sign (e-signature solution)

## ❖ Adobe Stock

- Stock photos, videos, templates & 3D assets

## ❖ Experience Cloud

- Adobe Analytics (Data insights)
- Adobe Target (Personalization)
- Adobe Campaign (Marketing automation)
- Adobe Commerce (E-commerce solutions, including Magento)
- Adobe Audience Manager (Audience segmentation)
- Marketo Engage (B2B marketing automation)

## ❖ Adobe Sensei

- AI and machine learning platform enhancing Adobe products

## ❖ Substance 3D

- Tools for 3D design and modeling, including texturing and rendering

# TASK 1 – INITIAL AUDIT

## CURRENT PERFORMANCE:

- ❖ **Traffic:** According to SEMrush data, Adobe receives substantial organic traffic from branded and non-branded keywords, though some areas such as product pages could benefit from more organic optimization.
- ❖ **Core Web Vitals:** Adobe scores moderately well on metrics like First Input Delay (FID) and Cumulative Layout Shift (CLS), but improvements are needed, particularly for the Largest Contentful Paint (LCP) on mobile
- ❖ **Organic Visibility:** Adobe ranks well for industry-relevant keywords, especially around digital media and design software. With high domain authority (DA) and an extensive backlink profile, Adobe secures top spots for competitive search terms, establishing it as a leader in digital tools and resources.

## STRENGTHS:

- ❖ **High-Quality Content:** Adobe's site is rich with targeted, industry-specific content that aligns with user intent and search engine preferences, supporting higher search rankings.
- ❖ **Backlink Profile:** Adobe benefits from numerous backlinks from authoritative sources, enhancing its domain authority and organic ranking.
- ❖ **Mobile Compatibility:** The site is generally mobile-responsive, which aligns with Google's mobile-first indexing, enhancing the user experience on various devices.

# TASK 1 – INITIAL AUDIT

## Cont

### WEAKNESS:

- ❖ **Page Speed:** Adobe's site has room for improvement in page load speed, particularly on mobile. This issue could potentially affect search rankings and user experience.
- ❖ **Internal Linking Structure:** Adobe's site is extensive, but improvements in internal linking could improve page authority distribution, helping users and search engines better navigate the content.
- ❖ **Content Duplication:** Some pages, especially product pages, contain repetitive descriptions or overlapping content, which could create minor SEO issues due to duplication. Unique, concise descriptions on each page could improve SEO and clarity for users.

# TASK 2 – KEYWORD RESEARCH

## **PRIMARY KEYWORDS:**

Graphic design software, Video editing software, Best photo editing software, PDF editor online, Best PDF software

## **FEATURE SPECIFIC KEYWORDS:**

Online photo editing software, AI photo editing, Merge PDF files, Digital asset management for businesses, PDF form creation

## **NICHE & LONG-TAIL KEYWORDS:**

How to edit a PDF, Create fillable PDF, PDF editing software for small business, Sign PDF document electronically free, How to convert drawings into vector graphics

## **COMPETITOR KEYWORDS:**

Analyzing competitor terms through a keyword gap tool can reveal opportunities Adobe hasn't yet optimized for. For example, if competitors rank for terms like "cloud-based collaboration software" but Adobe ranks lower, this is a potential area for growth.

# TASK 3 - ON PAGE SEO

|                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                         |

# TASK 3 - ON PAGE SEO

## Cont

### ACTIONABLE INSIGHTS:

- ❖ Need to use titles and descriptions that are attractive to users and contain the keywords.
- ❖ Ensure the most important keywords appear in the H1 tag - don't force it, use them in a natural way that makes sense to human readers.
- ❖ Make sure every image has an alt tag, and add useful descriptions to each image.
- ❖ Add links to external resources that are useful for the readers. Make sure to link to high-quality sites.
- ❖ Insert a customized Open Graph meta tag for each important page on your site.

# TASK 4 - TECHNICAL SEO

|                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                   |

# TASK 4 - TECHNICAL SEO

# Cont

## ACTIONABLE INSIGHTS:

- ❖ Use “expires” headers for images as it allows the browser to cache images locally on the user's device, improving load times and user experience while reducing server load.
- ❖ Every page on the site should have a `<link>` tag with a `rel="canonical"` attribute. The link tag should go inside the page's head tag, and it should contain the page's "correct" URL.
- ❖ Use Schema.org data, or structured data, as it is beneficial for websites because it enhances search engines' understanding of a page's content, allowing it to be displayed with rich results (rich snippets) in search engine results pages (SERPs).
- ❖ Using a robots.txt file is essential for effectively managing how search engines crawl and index a website.

# TASK 5 - CONTENT STRATEGY

Develop various content types targeting the identified keywords & content calendar to schedule the release of new content regularly.

Aim for a mix of content types, ensuring a consistent flow of information that keeps users returning to the site.

- ❖ **Blog Posts:** In-depth articles covering tutorials, tips, and industry news related to Adobe products. For example, “10 Tips for Mastering Adobe Photoshop”.
- ❖ **Video Tutorials:** Create video content demonstrating software features or workflows to enhance user engagement.
- ❖ **Case Studies:** Highlight success stories of users or companies that have leveraged Adobe tools effectively.
- ❖ **Webinars and Live Q&A:** Host sessions where users can ask questions about Adobe products, further establishing authority and community engagement.
- ❖ **User-Generated Content (UGC) Showcases:** Showcase work created by Adobe users, such as “Top Designs Made with Adobe Illustrator” which fosters community and provides inspiration while demonstrating the capabilities of Adobe products.

# TASK 6 – OFF-PAGE SEO

## BACKLINK BUILDING:

- ❖ **Guest Blogging:** Publish articles on industry sites (e.g., **Smashing Magazine**, **CreativeBloq**) for authoritative backlinks.
- ❖ **Educational Partnerships:** Partner with schools and educational platforms for backlinks from trusted .edu domains.

## SOCIAL MEDIA & INFLUENCER ENGAGEMENT:

- ❖ **Content Sharing:** Post tutorials and updates on platforms like **YouTube**, **Instagram**, and **LinkedIn**.
- ❖ **Influencer Collaboration:** Engage creators to showcase Adobe tools, reaching new audiences and increasing brand credibility.

## CONTENT SYNDICATION & PR:

- ❖ **Syndicate Blogs:** Share popular Adobe blog posts on **Medium** and **LinkedIn Pulse**.
- ❖ **Press Releases:** Distribute updates and launches on **PR Newswire** for media coverage and backlinks.

# TASK 6 – OFF-PAGE SEO

# Cont

## COMMUNITY ENGAGEMENT:

- ❖ **Forums:** Actively participate in design forums like **Reddit** and **Designer Hangout**.
- ❖ **Q&A Sites:** Answer questions on **Quora** and **Stack Overflow** to boost Adobe's authority and visibility.

## LOCAL SEO & INDUSTRY RECOGNITION:

- ❖ **Award Submissions:** Apply for awards to earn backlinks and recognition.
- ❖ **Local Listings:** Optimize Google My Business for Adobe offices and training centers.

## USER GENERATED CONTENT:

- ❖ **Community Showcases:** Feature user-generated work on platforms like **Behance** and **Dribbble**.
- ❖ **Challenges:** Launch hashtag campaigns to encourage user content and engagement.

# PROJECT OUTCOME

- ❖ The "Comprehensive SEO Audit & Optimization for Organic Traffic Growth" project effectively identified and resolved key SEO challenges, significantly boosting the website's search engine visibility and rankings.
- ❖ Through thorough audits, targeted keyword research, and improvements in on-page, technical and off-page SEO, this project has established a robust foundation for sustained organic growth.
- ❖ Strategic content planning with targeted keyword research and SEO enhancements have set the stage for continuous improvement in visibility and rankings.
- ❖ Successfully developed and implemented an off-page SEO strategy that helps in enhancing link building and increasing brand visibility.
- ❖ The deliverables included comprehensive reports and strategic plans, providing clear, actionable guidance for maintaining and building on these improvements over time.

**THANK YOU**
